

SAFE DRIVE, STAY ALIVE

**DORSET & WILTSHIRE
FIRE AND RESCUE**

Dear Student

Over the next two weeks you will be attending the digital 'Safe Drive, Stay Alive' roadshow. This project is designed to make the audience aware of the nature and extent of personal tragedy and suffering that a Road Traffic Collision can cause; there is no blood or gore - so don't worry, but it is hard-hitting real-life.

Your safety on our roads is of paramount importance to your friends, your family and us. We would very much appreciate your help to evaluate our roadshow. In order to do this, we are asking you to complete this quick questionnaire with seriousness and honesty; please don't answer as you think you 'should'. Thank you.

This questionnaire is confidential and there is no identifying factor.

Please use this [link](#) to complete the questionnaire.

Please note: After the show, you will receive another questionnaire link; this is to assess the effectiveness of our work. By answering **both** questionnaires, you are helping us to understand the pressures you face as passengers, drivers & riders and therefore the main issues to we should address and how to improve our work.

We thank you in advance for this support and time. It is vital we can provide evidence to potential sponsors & supporters of the worth and benefits of SDSA in order to secure this education for future young drivers.

Kind Regards

Christine Sharma, Mandy Pantall and Hannah Lynch
